DEFENDANT NCAA'S TRIAL BRIEF

Judge: Hon. Claudia Wilken
Date: June 9, 2014
Courtroom: 2, 4th Floor

TABLE OF CONTENTS

	Page
I. INTRODUCTION AND OUTLINE OF TRIAL BRIEF	1
II. THE NCAA’S RULES.....	1
III. THE NCAA’S RULES CAN AND SHOULD BE SUSTAINED FROM ANTITRUST CHALLENGE WITHOUT A FULL-BLOWN RULE OF REASON INQUIRY	2
IV. THE CHALLENGED RULES ALSO SURVIVE RULE OF REASON ANALYSIS	6
A. APs Will Fail to Show that the Challenged Rules Produce Anticompetitive Effects in a Relevant Market	6
1. APs Will Fail to Prove the Existence of Either Alleged Market.....	6
(a) The College Education Market for Division I/FBS Men’s Basketball and Football SAs	7
(b) APs Will Fail to Prove the Existence of a “Group Licensing” Market for the Use of their NIL in Game Broadcasts	7
(c) APs Will Fail to Prove the Existence of a “Group Licensing” Market for Footage or Videogames	13
2. APs Will Fail to Prove Anticompetitive Effects in Any Relevant Market	14
3. The Rules Do Not Restrain Former SAs from Licensing their NIL	16
4. The Challenged Rules Are Not Commercial Activity Subject to the Sherman Act	17
B. The Challenged Rules Promote Competition in Multiple Ways	19
1. The Rules Increase Consumer Choice and Demand	19
2. The Rules Increase Output	19
3. The Rules Maintain Competitive Balance	20
4. The Rules Further the Integration of Athletics and Education.....	21
V. NO LESS RESTRICTIVE ALTERNATIVE TO THE CHALLENGED RULES WOULD ACHIEVE THEIR PROCOMPETITIVE BENEFITS.....	23

Daniel A. Rascher & Andrew D. Schwarz, <i>Neither Reasonable nor Necessary:</i> <i>“Amateurism” in Big-Time College Sports</i>	3
Restatement (Third) of Unfair Competition § 46, § 49 (1995)	8

1 Defendant National Collegiate Athletic Association (“NCAA”) believes the evidence will
 2 show the following at trial. The NCAA reserves the right at the conclusion of the trial to present
 3 formal proposed findings of fact and conclusions of law on these or other issues.

4 **I. INTRODUCTION AND OUTLINE OF TRIAL BRIEF**

5 The Antitrust Plaintiffs (“APs”) have alleged a restraint of trade that consists of certain of
 6 the NCAA’s amateurism rules. Section II of this brief identifies the rules at issue and briefly
 7 explains why the NCAA’s member colleges and institutions have adopted them. Section III
 8 explains that, because these rules help to preserve the amateur character of college sports, this
 9 Court should uphold them without a full-blown rule of reason analysis. Section IV explains why,
 10 even if this Court holds that a full rule of reason analysis is necessary, the rules also should be
 11 upheld for at least three reasons: (1) APs cannot prove that the rules cause anticompetitive harm
 12 in any market; (2) any anticompetitive harm does not substantially outweigh the rules’ significant
 13 and well-recognized procompetitive benefits; and (3) APs cannot prove that these benefits could
 14 be achieved—or that NCAA sports would still be amateur—under a less restrictive alternative.

15 **II. THE NCAA’S RULES**

16 Colleges created the NCAA to help enforce rules that protect the amateur and academic
 17 values they have chosen for intercollegiate sports: “[The] basic purpose of this Association is to
 18 maintain intercollegiate athletics as an integral part of the educational program and the athlete as
 19 an integral part of the student body and, by so doing, retain a clear line of demarcation between
 20 intercollegiate athletics and professional sports.” TX 2340-15.

21 To that end, coordinating themselves through the NCAA, colleges and universities have
 22 agreed on several “basic principles” for intercollegiate athletics, including two that are directly
 23 relevant here: (1) “Student-athletes [“SAs”] shall be amateurs in an intercollegiate sport, and their
 24 participation should be motivated primarily by education and by the physical, mental and social
 25 benefits to be derived,” and (2) SAs must be students whose athletic “activities are conducted as
 26 an integral part of the [SA’s] educational experience.” TX 2340-17, -18.

27 The NCAA’s member institutions have adopted a number of rules to further these
 28 principles. According to APs, their claims are directed at only one aspect of these rules: the rules

1 that prohibit SAs from being paid for the commercial use of their name, image or likeness
 2 (“NIL”). *See* Dkt. No. 999 at 1:18-19 (claims “confined” to “restraint against compensation for
 3 commercial use and licensing of SAs’ NIL”). Indeed, APs have made clear that they are not
 4 challenging the NCAA’s rules against SAs being paid in other ways. *See, e.g.*, Dkt. No. 172 at
 5 13:25 (“Yet that scenario—commonly known as “pay-for-play”—is not at issue in this
 6 litigation.”); *Keller v. NCAA*, Dkt. No. 999 at 1:17-18 (APs are “not advocating salaries for SAs”).
 7 Rather, APs have claimed that they are challenging the rules to the extent that they prohibit group
 8 licenses of supposed rights of publicity in SAs’ NIL. *See, e.g.*, Dkt. No. 651 at 11:16-20, Dkt. No.
 9 819 at 3:17-4:3, 17:7-24, 23:4-24:23 (class certification); Dkt. No. 999 at 8:13-16, Tr. of Hr’g,
 10 Feb. 20, 2014, at 7:8-16 (summary judgment); Dkt. No. 1071 at 7:26-8:6 (pre-trial statement).

11 Under NCAA rules, an SA is ineligible to participate in intercollegiate athletics if he or she
 12 “[a]ccepts any remuneration for or permits the use of his or her name or picture to advertise,
 13 recommend or promote directly the sale or use of a commercial product or service of any kind.”
 14 Bylaw 12.5.2.1 (TX 2340-85). According to APs, it is an unlawful restraint of trade to prohibit
 15 SAs from being paid for group licenses of supposed rights to use their NIL in (1) live broadcasts
 16 of football and men’s basketball games, (2) rebroadcasts or other uses of footage of those
 17 broadcasts, and (3) college football and men’s basketball-themed videogames. The NCAA will
 18 address these allegations at trial as follows.

19 **III. THE NCAA’S RULES CAN AND SHOULD BE SUSTAINED FROM ANTITRUST**
 20 **CHALLENGE WITHOUT A FULL-BLOWN RULE OF REASON INQUIRY**

21 The Court has held that the challenged rules must be judged under the rule of reason rather
 22 than *per se* analysis. Dkt. 1025, at 7:14-17. We discuss the evidence in light of the traditional rule
 23 of reason analysis in Part IV, below. Under controlling law, however, the evidence suffices for the
 24 NCAA’s rules to be sustained without the need for the entirety of that analysis.

25 The NCAA is a joint venture. The Supreme Court has called the NCAA and other sports
 26 organizations the “leading example[s]” of “activities [that] can only be carried out jointly” because
 27 sports require “rules on which the competitors agreed to create and define the competition to be
 28 marketed.” *NCAA v. Bd. of Regents of Univ. of Okla.*, 468 U.S. 85, 101 (1984) (quotations

1 omitted).¹ APs' expert, Dr. Rascher, agrees that the NCAA is "appropriately described as a joint
 2 venture that has, like other joint ventures, certain aspects that must be agreed upon." Daniel A.
 3 Rascher & Andrew D. Schwarz, *Neither Reasonable nor Necessary: "Amateurism" in Big-Time*
 4 *College Sports*, Antitrust (Spring 2000).

5 The Supreme Court has held that, where an alleged restraint involves "the core activity of
 6 the joint venture itself," there is no need to analyze whether the restraint is reasonably necessary to
 7 achieve procompetitive benefits. *Texaco Inc. v. Dagher*, 547 U.S. 1, 7-8 (2006). Rather, an
 8 agreement of this kind is "likely to survive the Rule of Reason" and can be upheld without
 9 "detailed analysis" in the "twinkling of an eye." *Am. Needle, Inc. v. NFL*, 560 U.S. 183, 203
 10 (2010) (citations and internal quotation marks omitted). *See also Broad. Music, Inc. v. Columbia*
 11 *Broad. Sys., Inc.*, 441 U.S. 1, 23 (1979) ("Joint ventures and other cooperative arrangements are
 12 . . . not usually unlawful, at least not as price-fixing schemes, where the agreement on price is
 13 necessary to market the product at all.").

14 APs are incorrect that the standard is whether eliminating the rules would "extinguish
 15 college sports altogether." Dkt. No. 172 at 25. As the Supreme Court has made clear, a measure
 16 that creates the unique "character" of a product "enables a product to be marketed which might
 17 otherwise be unavailable." *Bd. of Regents*, 468 U.S. at 102; *see also Broad. Music, Inc.*, 441 U.S.
 18 at 23-23 (upholding "blanket license" that created a "different product" with "unique
 19 characteristics"). If the members' agreement *defines* the joint venture's product, then eliminating
 20 the agreement would change the product from the one the venture intended to produce.

21 Accordingly, rather than conduct a "detailed analysis" of the effect of NCAA rules on
 22 competition, courts have first asked whether the rules at issue define the NCAA's members'
 23 product of intercollegiate athletics. The courts are uniform on the controlling legal standard in this
 24 context: "when an NCAA bylaw is clearly meant to help maintain the 'revered tradition of
 25

26 ¹ This reasoning was essential to the Court's holding that the NCAA's television plan was not
 27 unlawful *per se*: "Thus, despite the fact that this case involves restraints on the ability of member
 28 institutions to compete in terms of price and output, a fair evaluation of their competitive character
 requires consideration of the NCAA's justifications for the restraints." *Id.* at 103.

1 amateurism in college sports’ or the ‘preservation of the student-athlete in higher education,’ the
 2 bylaw will be presumed procompetitive, since we must give the NCAA ‘ample latitude to play
 3 that role.’” *Agnew v. NCAA*, 683 F.3d 328, 342-43 (7th Cir. 2012) (quoting *Bd. of Regents*, 468
 4 U.S. at 120).² “[T]he first—and possibly only—question to be answered when NCAA bylaws are
 5 challenged is whether the NCAA regulations at issue” fit this description. *Id.* at 342; *see also id.*
 6 at 343 n.7 (“One should not mistake the analysis we discuss here as requiring proof of the
 7 procompetitive nature of the NCAA’s ‘no payment’ rules on a case-by-case basis. This analysis
 8 involves a determination of whether a rule is, on its face, supportive of the ‘no payment’ and
 9 ‘student-athlete’ models, not whether ‘no payment’ rules are themselves procompetitive—under
 10 *Board of Regents*, they clearly are.”).

11 The NCAA’s witnesses will explain that the rules at issue here—the rules prohibiting
 12 payments to SAs for their NIL—are designed to maintain the NCAA’s core product of amateur
 13 athletics. These and other rules are promulgated by an entire Amateurism Cabinet, which is
 14 comprised of college administrators and educators and guided by the principle that “student
 15 participation in intercollegiate athletics is an avocation, and student-athletes should be protected
 16 from exploitation by professional and commercial enterprises.” TX 3152-1.

17 Undisputed objective evidence will show that “the definitions of amateurism that have
 18 been adopted by other organizations”—the standard that APs say must be used to assess the
 19 NCAA’s defense—uniformly support the NCAA’s position. Dkt. No. 896-5 (Noll Merits Report)
 20 at 134. Both parties’ experts have surveyed amateur sports. None of them has found a single
 21 amateur sport in which an amateur athlete can be—or has been—paid a portion of licensing
 22 revenues earned from the broadcast of a game in which he appears. No amateur athlete in any
 23 sport has been paid for a “group license” for supposed rights to show his image in a live broadcast
 24 of his sport. SAs are asking the Court for a license to be the first self-described “amateur” athletes

25 _____
 26 ² *Accord Law v. NCAA*, 134 F.3d 1010, 1022 n.14 (10th Cir. 1998); *Banks v. NCAA*, 977 F.2d
 27 1081, 1089-90 (7th Cir. 1992); *McCormack v. NCAA*, 845 F.2d 1338, 1344-45 (5th Cir. 1988);
 28 *Metro. Intercollegiate Basketball Ass’n v. NCAA*, 339 F. Supp. 2d 545, 550 (S.D.N.Y. 2004);

 356, 383 (D. Ariz. 1983).

1 in history that would be able to seek such payments. This is clear evidence that the challenged
 2 rules against payments for SAs' NIL are "meant to help maintain the revered tradition of
 3 amateurism in college sports" and "the preservation of the student-athlete in higher education."
 4 *Agnew*, 683 F.3d at 342 (internal quotation marks omitted). And it suffices to dispense with APs'
 5 claims that SAs are not amateurs to begin with or that NCAA rule changes permitting greater
 6 *educational* support for SAs preclude NCAA sports from being amateur. Dkt. No. 172 at 12.

7 APs' "evidence," in contrast, will be purported "expert" opinions of Roger Noll and Ellen
 8 Staurowsky that the NCAA's collegiate model should be transformed to the type of "amateur"
 9 model they have advocated for in their writings and that APs advocate in this case. The law does
 10 not allow this result.

11 The law is that "the NCAA plays a vital role in enabling college football to preserve its
 12 character, and as a result enables a product to be marketed which might otherwise be unavailable.
 13 In performing this role, its actions widen consumer choice—not only the choices available to
 14 sports fans but also those available to athletes—and hence can be viewed as procompetitive." *Bd.*
 15 *of Regents*, 468 U.S. at 102. The antitrust laws do not require the NCAA's members to take this
 16 choice off the market by substituting APs' model of college sports for their own. *See Glen Holly*
 17 *Entm't, Inc. v. Tektronix Inc.*, 343 F.3d 1000, 1014, *amended*, 352 F.3d 367 (9th Cir. 2003)
 18 (antitrust "laws protect customers from harm directly related to the unlawful removal of a
 19 competitive product from the market"). Rather, "[t]he NCAA plays a critical role in the
 20 maintenance of a revered tradition of amateurism in college sports. *There can be no question but*
 21 *that it needs ample latitude to play that role.*" *Bd. of Regents*, 468 U.S. at 120 (emphasis added).

22 The antitrust laws permit the NCAA's members to define their own product and protect
 23 consumers' freedom to choose that product over others.³ APs cannot win by arguing that the
 24

25 ³ *See, e.g., Volvo Trucks N. Am., Inc. v. Reeder-Simco GMC, Inc.*, 546 U.S. 164, 180 (2006)
 26 ("Interbrand competition, our opinions affirm, is the primary concern of antitrust law.") (internal
 27 quotation marks omitted); *Pool Water Prods. v. Olin Corp.*, 258 F.3d 1024, 1034 (9th Cir. 2001)
 28 ("It is well established that the antitrust laws are only intended to preserve competition for the
 benefit of consumers.") (internal quotation marks and citation omitted); *Nat'l Soc. of Prof'l Eng'rs*
v. United States, 435 U.S. 679, 695 (1978) ("The assumption that competition is the best method
 of allocating resources in a free market recognizes that all elements of a bargain . . . are favorably

1 NCAA should change its product—which millions of Americans enjoy. APs are not “entitled to
 2 pre-empt the working of the market by deciding for itself that its customers do not need that which
 3 they demand.” *FTC v. Indiana Fed’n of Dentists*, 476 U.S. 447, 462 (1986); *see also United*
 4 *States v. Syufy Enters.*, 903 F.2d 659, 668 (9th Cir. 1990) (“While the successful competitor
 5 should not be raised above the law, neither should he be held down by law.”).

6 **IV. THE CHALLENGED RULES ALSO SURVIVE RULE OF REASON ANALYSIS**

7 No full rule of reason analysis is necessary. But even it were, APs cannot prevail. APs
 8 have the “initial burden of showing that the restraint produces ‘significant anticompetitive effects’
 9 within a ‘relevant market.’” *Tanaka v. Univ. of S. Cal.*, 252 F.3d 1059, 1063 (9th Cir. 2001)
 10 (citing *Hairston v. Pac 10 Conference*, 101 F.3d 1315, 1319 (9th Cir. 1996)). Only if APs make
 11 that showing (which they cannot do), does the NCAA have the burden to show that its rules have
 12 procompetitive benefits. *Id.* APs must then show that these procompetitive benefits “‘can be
 13 achieved in a substantially less restrictive manner.’” *Id.* Even if proven, this alternative is merely
 14 “a factor in determining the reasonableness” of the rules. *Los Angeles Mem’l Coliseum Comm’n*
 15 *v. Nat’l Football League*, 726 F.2d 1381, 1396 (9th Cir. 1984). APs’ ultimate burden is to prove
 16 that the rules cause anticompetitive effects that substantially outweigh their procompetitive
 17 benefits. Antitrust Law Developments (Seventh) at 62.

18 **A. APs Will Fail to Show that the Challenged Rules Produce Anticompetitive** 19 **Effects in a Relevant Market**

20 **1. APs Will Fail to Prove the Existence of Either Alleged Market**

21 APs must first show “that ‘a relevant market’ exists.” *Newcal Indus., Inc. v. Ikon Office*
 22 *Solution*, 513 F.3d 1038, 1044 (9th Cir. 2008). This “is an absolutely essential element of a rule of
 23 reason case.” *Los Angeles Mem’l Coliseum Comm’n*, 726 F.2d at 1391; *see also Gough v.*
 24 *Rossmoor Corp.*, 585 F.2d 381, 389 (9th Cir. 1978).

25
 26 _____
 27 affected by the free opportunity to select among alternative offers.”); *Helix Milling Co. v.*
 28 *Terminal Flour Mills Co.*, 523 F.2d 1317, 1320 (9th Cir. 1975) (“A major purpose of s 1 of the
 Sherman Act is to foster competition and to protect the ability of competitors to enter markets.”).

(a) *The College Education Market for Division I/FBS Men's Basketball and Football SAs*

APs first allege there is an “education” market for SAs who play men’s basketball and football. At times, APs have contended that SAs are “buyers” of educational services from colleges and universities. Yet APs admit that this alleged market is *not* a “market for the education of college athletes” at all but rather a market “in which Division I colleges and universities compete to recruit” SAs to “to play football or basketball.” *Id.* at 19 (emphasis added); *id.* at 9 (same). In other words, in this alleged market, SAs are supposedly selling their athletic talents to colleges and universities.

At trial, the NCAA’s experts will explain that APs’ experts have not conducted the proper quantitative analysis of either of these alleged markets, which is required. *See, e.g., Reifert v. S. Cent. Wisconsin MLS Corp.*, 450 F.3d 312, 318 (7th Cir. 2006) (“Actual data and a reasonable analysis are necessary to demonstrate that a product or service is a good substitute for another.”). *Cf. Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp.*, 509 U.S. 209, 242 (1993) (“Expert testimony is useful as a guide to interpreting market facts, but it is not a substitute for them.”).⁴ They will further explain that APs’ experts have improperly defined the market in terms of SAs’ preferences. *See Newcal Indus., Inc.*, 513 F.3d at 1045 (“The consumers do not define the boundaries of the market; the products or producers do.”).⁵

(b) *APs Will Fail to Prove the Existence of a “Group Licensing” Market for the Use of their NIL in Game Broadcasts*

⁴ As set forth in the NCAA’s motion for reconsideration of this Court’s summary judgment order, any “education” market extends to prospective students other than football and men’s basketball SAs. *See* Dkt. No. 1033 at 4-9. The NCAA’s experts should be permitted to offer testimony to this effect on what is a quintessential issue of fact to be decided on a full record at trial. *See Am. Ad Mgmt., Inc. v. GTE Corp.*, 92 F.3d 781, 790 (9th Cir. 1996); *Oltz v. St. Peter’s Cmty. Hosp.*, 861 F.2d 1440, 1446 (9th Cir. 1988).

⁵ Judge Easterbrook has explained well why consumer preference for a particular version of a product cannot define the produce market: “Suppose that a well-conducted survey shows that vanilla is people’s favorite flavor of ice cream, and by a large margin. It would not follow that vanilla ice cream is a separate market, because if its price rises any other ice cream producer could make more vanilla and less chocolate or pistachio.” *Menasha Corp. v. News Am. Mktg. In-Store, Inc.*, 354 F.3d 661, 665 (7th Cir. 2004).

(i) There is No “Group License” Market for NIL Rights in Broadcasts, Because There Are No Such Rights

The summary judgment order holds that “to establish the existence of a ‘group licensing’ market, [APs] must show that, absent the NCAA’s restraint on [SA] pay, [SAs] would have cognizable rights of publicity in the use of their [NIL] in live game broadcasts and archival game footage.” Dkt. 1025 at 15:11-16. APs cannot make this showing.

No statute or court decision in any state has ever recognized a right-of-publicity claim by a participant in a sporting event against a broadcaster for the use of his NIL in a live broadcast of the game. There is simply no legal authority whatsoever for such a claim. To the contrary, numerous state right-of-publicity statutes, including California’s, expressly preclude right-of-publicity claims for the use of one’s NIL in the broadcast of a sporting event.⁶ And numerous cases have so held under state common law.⁷ Thus, there is no reason why any broadcaster would purchase any group license for the use of SAs’ NIL, and APs cannot establish a “group licensing” market.

APs will also claim, as they have before, that the existence of exclusive broadcast contracts shows that there could be a group license market for the rights to use SAs’ NILs. That is wrong. The law has long recognized that a team, “by reason of its creation of the game, its control of the park, and its restriction of the dissemination of news therefrom, has a property right in such news,

WALA-TV, Inc.*, 675 So. 2d 360, 362 (Ala. 1996); *Jaubert v. Crowley Post-Signal, Inc.*, 375 So. 2d 1386, 1388-90 (La. 1979); *Battaglieri v. Mackinac Ctr. For Pub. Policy*, 680 N.W.2d 915, 919 (Mich. Ct. App. 2004); *see also* Restatement (Third) of Unfair Competition § 46, § 49 (1995).

1 and the right to control the use thereof for a reasonable time following the games.” *Pittsburgh*
 2 *Athletic Co. v. KQV Broad. Co.*, 24 F. Supp. 490, 492 (W.D. Pa. 1938); *see also* *Wis.*
 3 *Interscholastic Athletic Ass’n v. Gannett Co., Inc.*, 658 F.3d 614, 624 (7th Cir. 2011) (*Zacchini v.*
 4 *Scripps-Howard Broad. Co.*, 433 U.S. 562 (1977) “makes clear that the *producer* of entertainment
 5 is entitled to charge a fee in exchange for consent to broadcast”) (emphasis added); *id.* at 628
 6 (noting that “*the producer* of the entertainment—the NFL, FIFA, or the NCAA—normally signs a
 7 lucrative contract for exclusive, or semi-exclusive, broadcast rights for the performance”)
 8 (emphasis added).⁸ None of these cases held that a participant in a sporting event has a right to be
 9 compensated because his image appears in a broadcast of the event.

10 SAs do not have that right because they do not create college football or basketball games
 11 or control the stadiums where they are played. Their colleges and universities—either among
 12 themselves, or, in the case of the Division I Men’s Basketball Championship, through the
 13 NCAA—do. Take, for example, the Cal-Stanford football game, which has been played 116 times
 14 since 1892. Cal and Stanford have scheduled this game long before any of the SAs who will play
 15 in it have enrolled at either school. Cal and Stanford decide who can play in the game, march in
 16 the band, be part of the cheerleading squad, and buy tickets to enter the stadium. Cal and Stanford
 17 funded the training and equipment for the football teams, built the stadium where the game will be
 18 played and contracted for security to control access to it. As such, as a very practical matter, Cal
 19 and Stanford have the power to keep every network out other than ABC and charge ABC for the
 20 privilege. *See Pittsburgh Athletic Co.*, 24 F. Supp. at 492.

21 The SAs do not. They are only in the stadium at all because their colleges and universities
 22 have agreed to let them play, just as they have agreed to let the band march, the cheerleaders
 23 cheer, and the fans with tickets sit in the stands. SAs cannot own the right to broadcast their
 24
 25

26 ⁸ That was the basis of Zacchini’s claim against the network: he created and owned his act. His
 27 “professional property” had been appropriated. 433 U.S. at 569. Ohio state law’s protection of
 28 Zacchini’s property “provide[d] an economic incentive for him to make the investment required to
 produce a performance of interest to the public.” *Id.* at 576 (emphasis added).

1 games when they need the same permission that broadcasters do to be in the stadium at all.⁹
 2 Rather, SAs are part of the game. That is why their images are part of the broadcast—not because
 3 any supposed rights of publicity in those images have been transferred to the broadcaster. Indeed,
 4 APs have no evidence that any such *rights* are being transferred. Instead, the evidence will show
 5 that what is being transferred is the event owner’s right to broadcast the event. To be sure, the
 6 event consists of players—and a band, cheerleaders and fans—whose images will appear when the
 7 event is broadcast. But that says nothing about whether the players have enforceable rights of
 8 publicity to control this appearance of their image in the same way that they can control
 9 commercial uses. No court has ever recognized such rights.

10 APs also argue that the use of broadcast revenues to fund professional players’ contracts
 11 shows that their purported NIL rights could be licensed on a group basis. The evidence will show
 12 that APs are wrong. Professional athletes are paid shares of broadcast revenue as payment for
 13 their labor; they do not license their NIL for use in broadcasts of their games. Indeed, both
 14 parties’ experts agree that this revenue share is paid in the form of salaries for *playing* in the
 15 game—which APs have expressly said they are not seeking—and not for the use of players’
 16 *images in the broadcast* of the game.

17 In sum, the rights that SAs claim to have been restrained from licensing do not exist. In
 18 that case, APs’ claims fail because an antitrust plaintiff cannot prove antitrust injury from a
 19 supposed restriction on licensing intellectual property rights that do not exist. *See In re Hayes*
 20 *Microcomputer Prods., Inc. Patent Litig.*, No. C 84 4882 SC, 1989 WL 252349 (N.D. Cal. Mar.
 21 22, 1989) (“a plaintiff does not allege an antitrust injury by claiming damages stemming from an
 22

23 ⁹ Indeed, only where individual athletes act as co-entrepreneurs with promoters or other persons
 24 who organize a sporting event do they share in ownership of rights to broadcast the event. *See*
 25 *Ettore v. Philco Television Broad. Corp.*, 229 F.2d 481, 487 (3d Cir. 1956) (“Where a professional
 26 performer is involved, there seems to be a recognition of a kind of property right in the performer
 27 to the product of his services. The theory may be summed up as follows: The performer, as a
 28 means of livelihood, contracts for his services with an entrepreneur.”). Boxing is a classic
 example: the fighters have ownership rights in the events because each bout is a unique and
 discrete event, created and organized separately by the fighters themselves. *See id.*; *see also*
Sharkey v. Nat’l Broad. Co., Inc., 93 F. Supp. 986 (S.D.N.Y. 1950). That is not the case in college
 football and basketball games.

1 inability to license, what was later determined to be, an invalid patent”); *see also Modesto*
 2 *Irrigation Dist. v. Pac. Gas & Elec. Co.*, 309 F. Supp. 2d 1156, 1169-70 (N.D. Cal. 2004) *aff’d*
 3 *sub nom. Modesto Irrigation Dist.(MID) v. Pac. Gas & Elec. Co.*, 158 F. App’x 807 (9th Cir.
 4 2005) (antitrust plaintiff “cannot prove it sustained cognizable antitrust injury” if it does not
 5 possess the “legal right” to engage in the business allegedly restrained). Indeed, there is simply no
 6 authority for the proposition that an antitrust plaintiff can prevail on a claim alleging a restraint on
 7 a market for property that the law does not recognize. In order to show that there is a market to
 8 use SAs’ NIL in live broadcasts, APs must show that the law recognizes a property right in such
 9 use. No legal authority does so. Accordingly, APs’ claims fail as a matter of law.¹⁰

10 (ii) APs’ Argument that the Existence of the Right Does Not
 11 Matter for Antitrust Purposes is Wrong

12 In its order declining to certify the summary judgment decision for interlocutory appeal,
 13 the Court suggested that “some broadcasters might have sought to purchase such group licenses,
 14 regardless of whether the First Amendment (or any other law) actually protects them from right-
 15 of-publicity liability, simply as a precaution to avoid potential liability in the face of uncertain
 16 legal precedents.” Dkt. 1091 at 3:26-4:2. Even setting aside that the legal precedents are clear,
 17 not uncertain, this is incorrect as a matter of law: to prove a market for licensing their NIL for live
 18 broadcasts, APs must show that the law gives them a property right to control the appearance of
 19 their images in broadcasts. *Modesto Irrigation Dist. v. Pac. Gas & Elec. Co.*, 309 F. Supp. 2d at
 20 1169-70; *In re Hayes Microcomputer Prods., Inc. Patent Litig.*, 1989 WL 252349.

21 Nevertheless, APs cannot obtain an injunction on this alternative basis, either. APs can
 22 only obtain an injunction to prevent “threatened antitrust injury.” *Somers v. Apple, Inc.*, 729 F.3d

23 ¹⁰ In its motion for summary judgment and for certification for interlocutory appeal of the Court’s
 24 order resolving that motion, the NCAA explained that APs’ claims fail because the First
 25 Amendment precludes right-of-publicity claims for the use of one’s image in the live broadcast of
 26 a sporting event. *See* Dkt. No. 926 at 3-6; Dkt. No. 978 at 1-6; Dkt. No. 1032; Dkt. No. 1056.
 27 This remains the NCAA’s position, but in light of the Court’s rulings, the NCAA will not repeat it
 28 other than to note that APs will be unable to carry their burden of demonstrating that the speech at
 issue promotes a commercial transaction and/or that an identifiable and sufficiently important state
 interest justifies the burden that their theory of recovery would impose on that speech.

1 953, 967 (9th Cir. 2013); *see also Cargill, Inc. v. Monfort of Colo., Inc.*, 479 U.S. 104, 112 (1986).
 2 This threatened injury cannot be speculative. *See, e.g., Howard Hess Dental Labs. Inc. v.*
 3 *Dentsply Int'l, Inc.*, 602 F.3d 237, 251 (3d Cir. 2010) (“In a nutshell, the various examples of
 4 alleged injury the Plaintiffs have brought to our attention are purely speculative and thus are
 5 insufficient to justify an award of injunctive relief.”).

6 APs must also prove antitrust standing. *See Cargill, Inc.*, 479 U.S. at 112. Antitrust injury
 7 is only one factor in standing; another is “the speculative measure of the harm.” *Am. Ad Mgmt.,*
 8 *Inc. v. Gen. Tel. Co. of Cal.*, 190 F.3d 1051, 1054 (9th Cir. 1999) (quotation marks omitted). APs
 9 cannot obtain an injunction to remedy purely speculative antitrust injury. *See In re New Motor*
 10 *Vehicles Canadian Exp. Antitrust Litig.*, 522 F.3d 6, 14-15 (1st Cir. 2008) (affirming dismissal of
 11 antitrust claim for injunctive relief to remedy “speculative” harm); *Sprint Nextel Corp. v. AT & T*
 12 *Inc.*, 821 F. Supp. 2d 308, 317 (D.D.C. 2011) (antitrust laws do “not authorize suits by those
 13 whose allegations of threatened injury amount to little more than conjecture”) (dismissing claim
 14 for injunctive relief); *Broadcom Corp. v. Qualcomm Inc.*, 501 F.3d 297, 321 (3d Cir. 2007) (“The
 15 prospective harm to competition must not, however, be speculative.”). *Cf. Brooke Grp. Ltd.*, 509
 16 U.S. at 230-32 (rejecting theory of antitrust injury that “depends upon a complex chain of cause
 17 and effect”).

18 Courts reject theories of antitrust injury that are “based on an attenuated, speculative chain
 19 of events” and that “rel[y] on numerous independent actors.” *Nat’l ATM Council, Inc. v. Visa Inc.*,
 20 No. 1:11-CV-01803 (ABJ), --- F. Supp. 2d ---, 2013 WL 6671660, at *6-7 (D.D.C. Dec. 19, 2013)
 21 (dismissing theory that without “access fee rules, ATM operators would offer consumers
 22 differentiated access fees at the point of transaction, consumers would then demand multi-bug PIN
 23 cards from their banks, their banks would provide these cards, and the market for network services
 24 would become more competitive”); *see also Toscano v. PGA Tour, Inc.*, 201 F. Supp. 2d 1106,
 25 1117-18 (E.D. Cal. 2002) (dismissing antitrust claims that “depend on a multitude of speculative
 26 intervening events” including new “formation of competing senior professional golf tours in the
 27 absence of the media rights and conflicting events rules”). *Cf. Realnetworks, Inc. v. DVD Copy*
 28 *Control Ass’n, Inc.*, No. C 08-4548 MHP, 2010 WL 145098, at *5 (N.D. Cal. Jan. 8, 2010) (“Any

1 assertion by Real that the Studios’ refusal to license the copying of DVDs caused an antitrust
 2 injury apart . . . is contradicted by Real’s assertions that it believed no license was necessary.”).

3 APs’ theory that broadcasters would have licensed, or will license, NIL rights in broadcasts
 4 in the absence of any legal authority recognizing such rights is exactly the type of attenuated,
 5 speculative theory of antitrust injury that the law does not allow. The evidence will show that
 6 broadcasters have never purchased group licenses of SAs’ NIL rights from colleges, universities,
 7 conferences and/or the NCAA and that no NIL *rights* of any SAs are being transferred to networks
 8 when the NCAA, conferences or colleges license broadcast rights. This is why broadcasters
 9 negotiating licenses to televise team sporting events—and their experienced counsel—never even
 10 mention whether the teams or leagues who own the rights to broadcast these events have obtained
 11 these supposedly essential NIL rights from the players. And that is why the licenses themselves
 12 do not grant these rights to the broadcasters. *See, e.g.*, TX 2102, 2110, 2118, 2117, 2119, 2147,
 13 2151, 2226, 3028, 3029.

14 As such, there is no evidence that broadcasters who purchased these licenses actually
 15 exchange value for the SAs’ supposed NIL rights. APs will point to a few license agreements that
 16 refer to the use of SAs’ NIL in live broadcasts as evidence that such NIL rights actually exist and
 17 are transferred. But APs will have no evidence that any broadcaster believed that such a transfer
 18 of rights was occurring or necessary. And APs will have no evidence—none—that any portion of
 19 a license fee was paid for the supposed “right,” or that any such provision affected the value of
 20 any license in any way. The record evidence, in fact, will show the opposite.

21 (c) *APs Will Fail to Prove the Existence of a “Group Licensing”*
 22 *Market for Footage or Videogames*

23 APs will not prove group licensing markets for footage or videogames, either. With
 24 respect to footage, there can be no market for group licenses of SAs’ NIL for promotional
 25 purposes because state right-of-publicity laws do not recognize a cause of action for non-
 26 commercial uses which are also, as this Court has recognized, protected by the First Amendment.
 27 *See* Dkt. No. 1025 at 25-26. As to commercial uses, as explained in Part IV.A.3 below, NCAA
 28 rules prohibit licensing footage of current SAs for commercial purposes, so there is no market for

1 any rights that APs claim to have in such footage.

2 With respect to EA's videogames, there is no market for group licenses to use SAs' NIL
3 because the games did not use SAs' real names or faces and/or were a transformative use protected
4 by the First Amendment. As such, there were no rights to license. And because the NCAA and its
5 member institutions will not license the trademarks EA needs to make games with SAs' real
6 names and faces, there is no market for group licenses of SAs' NIL for those games, either.

7 2. APs Will Fail to Prove Anticompetitive Effects in Any Relevant Market

8 APs will not prove—as they must—any substantial anticompetitive effects in any market
9 in which the NCAA has market power. *See Newcal Indus., Inc.*, 513 F.3d at 1044 (antitrust
10 plaintiff must prove market power in rule of reason case); *Gough*, 585 F.2d at 390 (same).¹¹ APs
11 will not present any evidence that the rules have reduced output for consumers, “which is a sound
12 general measure of anti-competitive effect,” 11 P. Areeda & H. Hovenkamp, *Antitrust Law* §
13 1503(b), at 394 (1991). Indeed, “[t]he core question in antitrust is output. Unless a contract
14 reduces output in some market, to the detriment of consumers, there is no antitrust problem.”
15 *Chicago Prof'l Sports Ltd. P'ship v. Nat'l Basketball Ass'n*, 95 F.3d 593, 597 (7th Cir. 1996).¹²
16 The evidence will reveal all four of Dr. Noll's theories of anticompetitive effects as flawed.

17
18
19 ¹¹ *See also Eastern Food Servs., Inc. v. Pontifical Catholic Univ. Servs. Ass'n, Inc.*, 357 F.3d 1, 5
20 (1st Cir. 2004) (“Virtually always, anticompetitive effects under the rule of reason require that the
21 arrangement or action in question create or enhance market power.”); *United States v. Visa U.S.A.,*
22 *Inc.*, 344 F.3d 229, 238 (2d Cir. 2003) (plaintiff “must demonstrate that the defendant conspirators
23 have ‘market power’ in a particular market”); *L.A.P.D. Inc. v. Gen. Elec. Corp.*, 132 F.3d 402, 405
24 (7th Cir. 1997) (“proof of market power is essential; without it, any case under the Rule of Reason
25 collapses”).

26 ¹² *See also Menasha Corp. v. News Am. Mktg. In-Store, Inc.*, 354 F.3d 661, 663 (7th Cir. 2004)
27 (stating that “lower output and the associated welfare losses” are what “matter under the federal
28 antitrust laws”); *L.A.P.D. Inc.*, 132 F.3d at 404 (“Antitrust law is designed to protect consumers
from the higher prices—and society from the reduction in allocative efficiency—that occurs when
firms with market power curtail output.”); *Rebel Oil Co., Inc. v. Atl. Richfield Co.*, 51 F.3d 1421,
1433-1434 & n.4 (9th Cir. 1995) (“When a firm with market power cuts output to increase prices,
price exceeds marginal cost. This causes a loss to society of all that additional output which the
firm could produce by lowering its price to marginal cost.”); *LucasArts Entm't Co. v. Humongous*
Entm't Co., 870 F. Supp. 285, 289 (N.D. Cal. 1993) (“Limitations imposed by the antitrust laws
are thought to improve consumer welfare because they force firms to increase output from
monopolistic to competitive levels.”).

1 *First*, Dr. Noll contends that but for the NCAA’s rules, SAs would be paid cash for the use
2 of their NIL, which they are not paid today. That is not an “injury of the type the antitrust laws
3 were intended to prevent and that flows from that which makes defendants’ acts unlawful.” *Atl.*
4 *Richfield Co. v. USA Petroleum Co.*, 495 U.S. 328, 334 (1990) (quotation marks omitted). APs
5 have no evidence of any reduction in output or choice—or any increase in price—for colleges,
6 universities or fans. Quite the opposite. As a result of continued extraordinary demand for NCAA
7 sports and the advent of new television technologies, there are more live broadcasts and
8 rebroadcasts of college football and basketball than ever before. “Where the defendant’s conduct
9 harms the plaintiff without adversely affecting competition generally, there is no antitrust injury.”
10 *Paladin Associates, Inc. v. Montana Power Co.*, 328 F.3d 1145, 1158 (9th Cir. 2003).

11 *Second*, Dr. Noll contends that instead of paying SAs in cash for the use of their NIL,
12 colleges and universities have supposedly spent the money on coaches, facilities and other
13 benefits, which he says is an inefficient way to recruit. However, amenities designed to benefit
14 SAs make no sense as a measure of anticompetitive harm. *See Somers*, 729 F.3d at 963 (“There
15 can be no antitrust injury if the plaintiff stands to gain from the alleged unlawful conduct.”)
16 (quotation marks omitted). The Court will hear testimony about the benefits that SAs have
17 received from their coaches. Regardless, the NCAA’s experts will explain that there is no
18 evidence that increased spending on coaching salaries would have been paid to SAs instead. And
19 university administrators will testify that most major facilities projects are funded by debt or
20 donations which could not be raised to finance cash payments to SAs.

21 *Third*, Dr. Noll claims that some SAs have declined scholarships or left college early
22 because they could not obtain additional compensation to pay for the indirect costs of college not
23 covered by their scholarships. However, Dr. Noll’s method for proving this effect is pure
24 speculation. If Dr. Noll cannot find any information about why an SA with scholarship offers did
25 not appear or stopped appearing on a college football or basketball roster, he simply assumes that
26 the explanation is that college was too expensive. This reliance upon assertion rather than analysis
27 confirms APs’ dearth of evidence that the NCAA’s rules have limited output.

1 *Fourth*, the only products whose output Dr. Noll claims have been reduced are college-
 2 themed videogames with SAs' real names and faces.¹³ As to these products, however, Dr. Noll
 3 has not provided any economic analysis to determine whether the market is for college sports
 4 videogames, sports videogames, or all videogames. *See, e.g., Reifert*, 450 F.3d at 318. The
 5 answer matters, because EA's college-themed videogames are only a fraction of the videogame
 6 market. Since APs will not prove that the relevant market is equally limited, they will not be able
 7 to prove market power or significant anticompetitive effects. *See, e.g., United States v. Microsoft*
 8 *Corp.*, 253 F.3d 34, 70 (D.C. Cir. 2001) (noting, in exclusive dealing case, foreclosure of "roughly
 9 40% or 50% share usually required in order to establish a § 1 violation"); *Bepco, Inc. v. Allied-*
 10 *Signal, Inc.*, 106 F. Supp. 2d 814, 828 (M.D.N.C. 2000) (foreclosure of 18.5% or 21.5% of
 11 relevant market "fall[s] far short of any value presumed to be substantial").

12 **3. The Rules Do Not Restrain Former SAs from Licensing their NIL**

13 APs contend that the NCAA has restrained both current *and* former SAs from entering into
 14 group licenses for the use of their NIL. As to former SAs, the alleged restraint can only apply to
 15 licenses for the use of SAs' NIL in rebroadcasts or other non-live uses of game footage because,
 16 by definition, live broadcasts involve only *current* SAs. There is no restraint on former SAs.

17 NCAA bylaws have no force against SAs who are no longer eligible to participate in
 18 NCAA sports. APs will have no evidence to the contrary on this point. Instead, APs will point to
 19 an eligibility form that they contend SAs are required to sign in order to participate in NCAA
 20 sports. APs' theory appears to be that NCAA rules require them to sign a form giving up their
 21 NIL rights after college in order to play during college and these rights "have *already* been sold"
 22 when SAs graduate. Dkt. No. 172 at 6.

23 No evidence at trial will support this theory. The evidence will show that the only use the
 24 NCAA makes of SA NILs is to "generally promote NCAA championships or other NCAA events,
 25 activities or programs." TX 2240-4. That is all. As relevant here, that applies only to promoting
 26

27 ¹³ APs argue that the "NCAA would still sell jerseys tethered to actual players," but do not allege a
 28 market for any group licenses of NIL for jerseys. Dkt. No. 172 at 20.

1 one event—the Division I Men’s Basketball Championship. Otherwise, the NCAA has not
 2 obtained, does not own and does not license the right to use the NIL of any SAs. The NCAA
 3 owns the copyrights to footage of the Championship and licenses that footage to third-parties for
 4 other purposes but it does not purport to license the use of SAs’ NILs for those purposes.

5 Former SAs have full ownership of their NILs and are free to take legal action against
 6 unauthorized uses. Named APs will testify that they have licensed their NIL after college and that
 7 the NCAA did nothing to try and stop them. Further, the NCAA’s experts will explain that the
 8 licensing agencies’ files contain records of hundreds of licenses for former SAs. APs cannot and
 9 will not explain how to reconcile this testimony and evidence with their claim that the NCAA
 10 forced them to give up and then sold their NIL rights, leaving them nothing to license.

11 To the contrary, the NCAA warns third-parties at every turn that they need former SAs’
 12 consent to use their NIL. This is an explicit term of the NCAA’s licenses for its copyrighted
 13 footage, *see* TX 3053-2, and the NCAA’s licensing guidelines for its Corporate Champions and
 14 for broadcast networks such as CBS and ESPN.¹⁴ The NCAA repeatedly informs other third-
 15 parties of the same restriction.¹⁵ APs will fail to prove that the NCAA restrains former SAs.

16 4. The Challenged Rules Are Not Commercial Activity Subject to the 17 Sherman Act

18 Evidence that the NCAA does not license SAs’ NIL for commercial advantage will also
 19 establish that the NCAA’s rules are “not designed to generate profits in a commercial activity but

20 ¹⁴ *See* TX 3190-28 (“Photographic, video or other graphic individual images of [SAs] (even if
 21 only [SA] body parts; e.g., hands or feet) may be used for commercial purposes **only** after the
 22 [SA] has completed his or athletics eligibility and **upon receipt of consent from the individual**
 23 **pictured.**”) (emphasis added); TX 3009-0042, -43 (“In all instances, it will be the responsibility of
 24 the advertiser to obtain prior written consent of any individuals appearing in an advertisement or
 25 promotion.”) (emphasis in original); TX 332-5 (licensing guidelines for ESPN stating that rights
 26 “to use the images of individuals have to be obtained from . . . those persons”); TX 3017-9.

27 ¹⁵ *See, e.g.*, TX-0293-1 (Kraft Foods) (“Please note the NCAA does [not] own the likeness to the
 28 individuals featured on the footage and does not have the ability to give the individual’s
 consent.”); TX 0308-1 (Cingular) (“Cingular will need to clear all the likenesses of the athletes
 that appear in the footage if they are using as a commercial or promotional application. I cannot
 guarantee that the individuals will not charge a fee for the use of their likeness.”); TX 3176-1
 (DirecTV); TX 0336-1 (Nike); TX 303, 304, 313, 719, 3045, 3054, 3059, 3068, 3092, 3094, 3109,
 3113, 3128, 3135, 3136, 3137, 3138, 3154, 3673, 3716.

1 to preserve amateurism by assuring that the recruitment of student athletes does not become a
 2 commercial activity.” *Gaines v. NCAA*, 746 F. Supp. 738, 743-44 (M.D. Tenn. 1990). As such,
 3 they are “*anti-commercial* and designed to promote and ensure competitiveness amongst NCAA
 4 member schools.” *Bassett v. NCAA*, 528 F.3d 426, 433 (6th Cir. 2008) (emphasis in original).

5 That is why several courts have held that the NCAA’s amateurism rules are not
 6 commercial activity subject to the Sherman Act. *See id.* (“NCAA’s rules on recruiting student
 7 athletes, specifically those rules prohibiting improper inducements and academic fraud, are all
 8 explicitly non-commercial.”); *Smith v. NCAA*, 139 F.3d 180, 185-86 (3d Cir. 1998) *vacated on*
 9 *other grounds by*, 525 U.S. 459 (1999) (holding that “the Sherman Act does not apply to the
 10 NCAA’s promulgation of eligibility requirements” because “[r]ather than intending to provide the
 11 NCAA with a commercial advantage, the eligibility rules primarily seek to ensure fair competition
 12 in intercollegiate athletics”) (internal citations and quotation marks omitted).¹⁶

13 These decisions are consistent with Supreme Court and Ninth Circuit precedent that while
 14 “the Sherman Act expressly requires a showing of restraint ‘of *trade or commerce* among the
 15 several States,” “[n]ot every aspect of life in the United States is to be reduced to such a single-
 16 minded vision of the ubiquity of commerce.” *Dedication & Everlasting Love to Animals v.*
 17 *Humane Soc. of U.S., Inc.*, 50 F.3d 710, 712-714 (9th Cir. 1995) (emphasis added) (quoting 15
 18 U.S.C. § 1). *See also Klor’s, Inc. v. Broadway-Hale Stores, Inc.*, 359 U.S. 207, 214 (1959) (The
 19 Sherman “Act is aimed primarily at combinations having commercial objectives and is applied
 20 only to a very limited extent to organizations . . . which normally have other objectives.”) (citing
 21 *Apex Hosiery Co. v. Leader*, 310 U.S. 469, 493 (1940)).

22
 23
 24
 25 ¹⁶ *See also Gaines*, 746 F. Supp. at 743-44; *Jones v. NCAA*, 392 F. Supp. 295, 303-04 (D. Mass.
 26 1975) (upholding eligibility rules precluding SA compensation where plaintiff had “not shown
 27 how the action of the N.C.A.A. in setting eligibility guidelines ha[d] any nexus to commercial or
 28 business activities in which the defendant might engage”). *Cf. Marjorie Webster Jr. Coll., Inc. v.*
Middle States Ass’n of Colleges & Secondary Sch., Inc., 432 F.2d 650, 654-55 (D.C. Cir. 1970)
 (college accreditation policies were not commercial activity subject to Sherman Act).

1 **B. The Challenged Rules Promote Competition in Multiple Ways**

2 **1. The Rules Increase Consumer Choice and Demand**

3 As set forth above, the evidence will show that the NCAA’s amateurism rules define
4 NCAA sports as a unique product and thereby “widen consumer choice” for both fans and
5 athletes. *Bd. of Regents*, 468 U.S. at 102. Providing this additional choice is sufficient to sustain
6 the NCAA’s rules regardless of whether doing so increases demand. At a minimum, however, this
7 is also a procompetitive benefit relevant to a full rule of reason analysis.

8 The evidence will *also* show that, *in addition* to increasing consumer choice, the collegiate
9 model does increase consumer demand for college sports. The NCAA has the only statistical
10 evidence in the record on this question—a survey by an unchallenged expert, Dr. Michael Dennis,
11 which shows that interest in watching and attending college football and basketball games would
12 significantly decline if SAs received payments in the amounts that APs’ experts predict they
13 would without the NCAA’s rules. Importantly, the survey shows that interest would decline
14 among the most intense and the most casual fans alike, which corroborates other surveys and the
15 opinions of the NCAA’s experts.

16 APs do not have any statistical evidence to support their conjecture that fan interest would
17 not decline if SAs were paid as APs propose. They merely assert that it is “obvious” that “*some of*
18 what drives fan interest” is attributable to other factors. Dkt. No. 972 at 14 (emphasis added).
19 That proves nothing. APs rely on anecdotal examples about viewership for isolated games
20 involving SAs penalized for accepting improper payments, but make no effort to disaggregate
21 other factors that have nothing to do with the payments, including the public’s appetite for
22 “scandals.” APs also rely on the fact that some sports have remained popular after they were
23 professionalized, but ignore that these sports did not have to compete with already existing
24 professional leagues as college sports would if SAs were paid for appearing in televised games.

25 **2. The Rules Increase Output**

26 “The core question in antitrust is output.” *Chicago Prof’l Sports Ltd.*, 95 F.3d at 597.
27 Indeed, “a market can be said to become increasingly competitive when its output increases.” 11
28 P. Areeda & H. Hovenkamp, *Antitrust Law*, § 1901(a), at 225. The entire logic of a sports league

1 and why it “can only be carried out jointly,” *Bd. of Regents*, 468 U.S. at 101, is that it increases
 2 output of competition by making it possible to organize games. Indeed, the NCAA joint venture
 3 has increased output substantially. Since all of the 350 member colleges and universities in
 4 Division I agree on the rules that are consistent with their values, all of them can play each other.
 5 This provides for more permutations of possible games and potential matchups between diverse
 6 schools, which increases consumer choice and demand. The evidence will be undisputed that one
 7 key driver of March Madness’s enormous popularity is the fact that 350 schools are eligible for
 8 the tournament and the games are often never-before-seen matchups.

9 The NCAA will show at trial that, in a world where colleges and universities can pay SAs
 10 cash for their supposed NIL rights, the number of permutations will fall. If some colleges and
 11 universities decide to pay their SAs for group licenses for their NILs, other colleges and
 12 universities will have no interest in having their students play against SAs at these schools. Some
 13 will have no interest even in being part of an organization that allows these SAs to play. Other
 14 colleges and universities will leave Division I because they simply lack the resources to compete
 15 in cash bidding for recruits. The result will be a smaller league—fewer possible games and fewer
 16 potential matchups between different schools. In short, less competition.

17 **3. The Rules Maintain Competitive Balance**

18 “Numerous courts, including the Supreme Court, have recognized that promoting
 19 competitive balance among sports teams serves a ‘legitimate’ procompetitive purpose and may
 20 justify the imposition by sports leagues of certain restraints on competition.” Dkt. No. 1025 at 33
 21 (citing *Am. Needle*, 560 U.S. at 204). The courts have recognized promoting competitive balance
 22 as procompetitive in itself and have not required evidence of any effect of balance on demand.

23 Nevertheless, the evidence also will show that competitive balance is important to demand:
 24 if competition is too lop-sided, games are less interesting to watch, but they are also less
 25 interesting to watch if competition is so balanced that there are no dynasties and no underdogs.
 26 The ideal is some modest level of imbalance: enough to create storylines, but not so much as to
 27 create snoozers. The NCAA will present evidence showing that college football and men’s
 28 basketball are at least as balanced—or about as properly imbalanced—as the NFL and the NBA.

1 However, the real issue is not whether college sports are properly balanced but what
 2 factors explain success in college sports and whether eliminating the NCAA's rules would change
 3 those factors in ways that are inappropriate for educational institutions.

4 According to APs' experts, money is the determining factor in success in all sports.
 5 Indeed, they have elevated this theory to the "Invariance Principle" which supposedly holds that,
 6 no matter what the rules of a sports league are, the teams with the most money will always be the
 7 best. Thus, APs' experts claim that changing the NCAA's rules will have no effect whatsoever.

8 This is wrong. The NCAA's experts will present empirical analyses showing that revenue
 9 and spending are not strongly correlated with success and that, instead, non-monetary factors play
 10 a large role. The NCAA's experts will also present analyses showing that, in APs' but-for world
 11 where colleges can use broadcast revenues to pay SAs for their NIL, many recruits will have
 12 significant—in many cases, six-figure—incentives to attend schools with more revenue. In those
 13 circumstances, it is basic economics that allowing cash payments for NIL for the first time will tilt
 14 the distribution of talent and success towards colleges and universities with more cash to spend.

15 However, the evidence will also show that because students choose where to go to college,
 16 the NCAA's member institutions will not be able to use professional teams' methods—such as
 17 drafts and trades—to preserve balance in a market for cash offers for NIL. Recruits in Oakland
 18 cannot be drafted by Stanford and SAs at Berkeley cannot be traded to UCLA.

19 **4. The Rules Further the Integration of Athletics and Education**

20 The NCAA will show that the rules at issue improve the quality of the education that SAs
 21 receive—which is a classic procompetitive benefit. *See Cnty. of Tuolumne v. Sonora Cmty. Hosp.*,
 22 236 F.3d 1148, 1160 (9th Cir. 2001) ("any anticompetitive harm is offset by the procompetitive
 23 effects of SCH's effort to maintain the quality of patient care that it provides."); *see also*
 24 *Deutscher Tennis Bund v. ATP Tour, Inc.*, 610 F.3d 820, 833 (3d Cir. 2010) (sport "rules and
 25 regulations can be procompetitive where they enhance the 'character and quality of the
 26 'product'"') (quoting *Bd. of Regents*, 468 U.S. at 112); *United States v. Brown Univ.*, 5 F.3d 658,
 27 674 (3d Cir. 1993) (colleges' agreement was procompetitive if it "improved the quality of the
 28 educational program"); *McCormack v. NCAA*, 845 F.2d 1338, 1345 (5th Cir. 1988) ("The goal of

1 the NCAA is to integrate athletics with academics.”). Thus, APs are simply wrong that the
2 educational nature of NCAA rules cannot be procompetitive. Indeed, the procompetitive benefits
3 of improving education justify restraints on competition that might otherwise violate the antitrust
4 laws. *See Brown Univ.*, 5 F.3d at 678 (“It may be that institutions of higher education require that
5 a particular practice, which could properly be viewed as a violation of the Sherman Act in another
6 context, be treated differently.”) (internal quotation marks omitted).

7 The evidence will show that the NCAA’s rules improve SAs’ educational experience in
8 two ways. *First*, by ensuring that SAs’ involvement in intercollegiate athletics is as students
9 rather than as professionals, the rules focus SAs on spending their time doing what students do
10 rather trying to make as much money as possible, which is what professionals do. The NCAA will
11 present hard evidence—data—that football and men’s basketball SAs, do, in fact get an education,
12 including statistical analyses showing that these SAs graduate and achieve success at equal or
13 higher rates than other young people with similar backgrounds.

14 Further, numerous college and university administrators will testify based on their many
15 decades of experience in higher education that permitting SAs to participate in a bidding war
16 would undermine their ability to be effective students. No less than in other areas of the law, this
17 testimony about how to advance an institution’s educational mission must be assessed in
18 accordance with “our tradition of giving a degree of deference to a university’s academic
19 decisions, within constitutionally prescribed limits.” *Grutter v. Bollinger*, 539 U.S. 306, 328
20 (2003) (“Our scrutiny of the interest asserted by the Law School is no less strict for taking into
21 account complex educational judgments in an area that lies primarily within the expertise of the
22 university.”); *see also Fisher v. Univ. of Texas at Austin*, 133 S. Ct. 2411, 2419 (2013) (affirming
23 “deference to the University’s conclusion, based on its experience and expertise, that a diverse
24 student body would serve its educational goals”) (internal quotations omitted).

25 APs will only point to anecdotal allegations that some SAs at some schools have not been
26 focused on or have not received a college education. These isolated examples fail to prove that the
27 rules fail for the majority of SAs who want an education. And, importantly, the anecdotes do not
28 show that eliminating the rules would improve education for any SA at any school.

1 *Second*, the rules make it possible for colleges and universities to support broad-based
 2 athletics programs that bring to campus hundreds of SAs in dozens of other sports who might
 3 otherwise not be able to attend college. These SAs enhance the diversity of the student body with
 4 whom football and men’s basketball SAs can interact, which improves their college experience.
 5 *See Brown Univ.*, 5 F.3d at 674 (district court erred by rejecting procompetitive justification that
 6 by “promoting socio-economic diversity at member institutions,” policies “improved the quality of
 7 the education offered by the schools and therefore enhanced the consumer appeal”). *Cf. Grutter*,
 8 539 U.S. at 328 (deferring to school’s “educational judgment that such diversity is essential to its
 9 educational mission” and noting that the “assessment that diversity will, in fact, yield educational
 10 benefits is substantiated” by numerous studies). Further, the opportunity to attend games in other
 11 sports and support the SAs who play in them improves the campus community for all students,
 12 including football and men’s basketball SAs. Indeed, APs admit it is “obvious” that athletics
 13 create an “enduring connection between the university and its students, alumni, and area
 14 residents.” Dkt. No. 172 at 14. University presidents and administrators will explain that APs are
 15 wrong that their injunction “would not disrupt that connection in any way.” *Id.*

16 **V. NO LESS RESTRICTIVE ALTERNATIVE TO THE CHALLENGED RULES**
 17 **WOULD ACHIEVE THEIR PROCOMPETITIVE BENEFITS.**

18 As explained above, there is no need to analyze whether the rules’ “legitimate objectives
 19 can be achieved in a substantially less restrictive manner.” *Tanaka*, 252 F.3d at 1063. This
 20 inquiry has “no application here, where the challenged business practice involves the core activity
 21 of the joint venture itself.” *Dagher*, 547 U.S. at 7. Nevertheless, under a full rule of reason
 22 inquiry, APs must “show that ‘an alternative is *substantially* less restrictive and is virtually as
 23 effective in serving the legitimate objective without significantly increased cost.’” *Cnty. of*
 24 *Tuolumne*, 236 F.3d at 1159 (emphasis in original) (internal quotation marks omitted).

25 APs agree that the governing legal standard means that any proposal for paying SAs must
 26 be consistent with amateurism: “The issue is not whether college sports should remain amateur,
 27 but whether the NCAA’s definition of an amateur and its rules to enforce that definition are
 28 reasonably necessary to retain the amateur status of college sports and the popularity of college

1 athletics that, according to defendants’ experts, flow from its amateur status.” Dkt. No. 896-4
2 (Noll Reply Report) at 4. As this Court has ordered, “Plaintiffs represented at the hearing that
3 they will not proffer any less restrictive alternatives at trial that their experts did not discuss in
4 their reports.” Dkt. No. 166 at 11. In his reports, Dr. Noll analyzed two very specific methods “to
5 address whether the objectives that are served by a reasonable definition of amateurism could be
6 achieved by a less restrictive rule.” Dkt. No. 896-5 (Noll Merits Report) at 134. Neither avails
7 APs.

8 *First*, Dr. Noll proposes to “rely on the definitions of amateurism that have been adopted
9 by other organizations.” *Id.* He opines that “[t]he policies in other amateur sports identify less
10 restrictive alternatives that the NCAA could have adopted.” *Id.* In other words, APs recognize
11 that other amateur sports organizations provide objective evidence of whether the NCAA’s rules—
12 and NCAA sports—are amateur. The problem is that, as explained above, none of them allows or
13 provides the payments for group licenses that APs claim would be consistent with amateurism.

14 *Second*, Dr. Noll proposes that “[r]evenues from licensing the bundle of the intellectual
15 property of a college and the NILs of its team members would be divided between a college and
16 its team members in accordance with common practices in other markets, and then the team share
17 would be divided among team members in equal shares, again in accordance with common market
18 practices.” Dkt. No. 896-5 at 134. The “common market practices” for distributing licensing
19 revenue that Dr. Noll has examined are “practices in professional sports.” *Id.* at 88-89.

20 There are two problems with this professional “yardstick” approach. Most obviously, any
21 proposed alternative for paying SAs that is drawn from professional sports is not an alternative
22 way to preserve amateurism in college sports. It is a proposal to eliminate amateurism. Calling
23 APs amateurs while paying them as professionals is a label, not a less restrictive alternative.

24 Dr. Noll’s equal-sharing model also has no grounding in fact. Equal sharing of broadcast
25 revenue does not happen in sports. Indeed, the evidence will show that there are no group licenses
26 at all for the use of NFL or NBA players’ NIL in live broadcasts, let alone any sport where the
27 athletes were paid equally for such a license for the use of supposed NIL rights.

28 Absent any evidence that any sport—amateur or professional—has ever implemented

1 group licenses for the use of athletes' NIL in live broadcasts with equal revenue sharing, APs'
 2 suggested regime is not a less restrictive alternative for what the NCAA's rules *could* be but rather
 3 a proposal for what the NCAA's rules *should* be. But

4 plaintiffs cannot be permitted to offer possible less restrictive
 5 alternatives whose efficacy is mainly a matter of speculation. A
 6 skilled lawyer would have little difficulty imagining possible less
 7 restrictive alternatives to most joint arrangements. Proffered less
 8 restrictive alternatives should either ***be based on actual experience
 in analogous situations elsewhere*** or else be fairly obvious.
 Tending to defeat such an offering would be the defendant's
 evidence that the proffered alternative has been tried but failed, that
 it is equally or more restrictive, or otherwise unlawful.

9 11 Phillip E. Areeda, *Antitrust Law* ¶ 1913b, at 375-76 (2011) (emphasis added). Were it
 10 otherwise, "the imaginations of lawyers" would be guaranteed to "conjure up some method of
 11 achieving the business purpose in question that would result in a somewhat lesser restriction of
 12 trade[.]" and "courts would be placed in the position of second-guessing business judgments as to
 13 what arrangements would or would not provide 'adequate' protection for legitimate commercial
 14 interests." *Am. Motor Inns, Inc. v. Holiday Inns, Inc.*, 521 F.2d 1230, 1249-50 (3d Cir. 1975).¹⁷

15 In short, APs' proposed alternatives are blueprints for the NCAA to produce a different
 16 kind of sports, which deprives the NCAA's members of "'ample latitude' to adopt rules preserving
 17 'the revered tradition of amateurism in college sports.'" Dkt. No. 876 at 15 (quoting *Bd. of*
 18 *Regents*, 468 U.S. at 120). APs' claims accordingly fail.

 26 (rejecting "less restrictive alternatives" that "are more hypothetical than practical"). Cf. Dep't of
 27 Justice & Federal Trade Comm'n, *Horizontal Merger Guidelines* 30 (Aug. 19, 2010) ("Only
 28 alternatives that are practical in the business situation faced by the merging firms are considered in
 making this determination.").
